

## Large format Media for Cad/Gis

### **PPC BOND PAPER 3" Core 80gsm 150m**

PPC products are suitable for all mainstream copiers. Products have a low moisture content specifically developed for PPC applications. They have a high white and bright background ensuring maximum contrast reproductions with minimal show through.

### **REPORT GRADE PAPER 80 GSM**

High quality bond paper for monochrome and medium resolution colour line reproduction. A product to achieve excellent results whilst still achieving good value for money.

### **REPORT GRADE PAPER 90 GSM**

A heavier bond paper for monochrome and medium resolution colour line reproduction. Excellent lay flat quality with very uniform paper composition. Very dense blacks and colour fills.

### **739 Premium Coated Paper 90 gsm**

A fully coated matt paper for medium/high resolution monochrome and colour plotting and medium resolution poster graphics. The ink receiver layer is designed for vivid, high density colours providing excellent contrast and dries instantly. Up to 1440 dpi. Compatible with dye based, pigmented and oil based inks. Excellent results with both hot and cold laminates.

### **INK JET TRACING PAPER 90 GSM**

Designed exclusively for use on monochrome ink jet printers. Sharp black line is achieved with this paper. Completely uniform paper fibres giving an exceptionally high quality transparency.

### **INK JET DOUBLE MATT FILM 75 MICRON**

A semi transparent polyester drafting film coated on one side with an ink jet receptive formula designed for a wide range of colour and black and white printers. The back side has a matt drafting plotter coating, which can also be drawn on. This film can also be used with the HP pigmented black.
