

## Large format Media for Graphics All 2" core except where otherwise stated.

### PREMIUM COATED PAPER 120 GSM. Also available on 3" core

A mediumweight fully coated paper designed for full colour printing where density and vibrant colours are required.

Recommended for use on all engineering plotters and high volume usage on graphic plotters. The product is also suitable for use with Piezo inks.

### 748 UNIVERSAL PREMIUM PAPER 160gsm

A coated heavy weight paper designed to be more stable for a variety of applications. Exceptional colours with both dye and pigmented inks.

Its ability to hot and cold laminate makes it a good choice for processes needing lamination.

### 764/765 PREMIUM PHOTO SATIN/GLOSS PAPER 170GSM

Premium Photo Paper is a true photo paper designed for use with dye based inks with Thermal print head technology.

It is ideal for posters, photographic applications and short term displays.

### 762/763 INSTANT DRY PHOTO SATIN/GLOSS PAPER 210 gsm

Instant dry Photo Paper is a heavy weight true photo base, satin finish paper. It has the next generation coating to make it instant dry and moisture resistant.

It also has a wide ranging compatibility with Thermal and Piezo printers using both dye and pigmented inks.

### 729 PREMIUM ARTIST CANVAS 290GSM

Premium Canvas is a 100% natural cotton canvas with a semi-matt ink jet coating. Being a true artistic canvas it can be stretched for framing.

It can also be sewn and grommeted to be used as a banner alternative. It is specifically designed for use with dye based inks.

### 730 UNIVERSAL CANVAS 330GSM

Universal Canvas is a 100% cotton canvas with a matt ink jet coating. Being a true artistic canvas it can be stretched for framing.

It can also be sewn and grommeted to be used as a banner alternative.

It has excellent archiving qualities and is compatible with most inkjet technology; thermal and piezo, dye and pigmented inks.

large selection Roll sizes available
